of our delegates in
June 2010 rated this
Masterclass as 'good' or
'excellent'

**1st July
2011**

**Royal College of Physicians
Regent's Park, London**

Overview

A one day Masterclass for General Practitioners, Specialist Registrars in General Practice and Neurology, Specialist Nurses and other health professionals designed to improve the skills required to successfully diagnose and manage patients suffering from headache disorders.

WHY LEARN ABOUT HEADACHE DISORDERS?

- Headache is one of the commonest reasons for patients to consult with a doctor
- The burden of headaches on patients, health services and society as a whole is extremely high
- Headache syndromes are under-estimated, under-diagnosed and under-treated
- Patient's quality of life can be greatly improved by effective diagnosis and treatment

LEARNING OBJECTIVES

- Develop a better understanding of secondary headaches such as high and low pressure headaches, medication overuse headache, post-traumatic headaches, and other symptomatic headaches
- Diagnose and evaluate patients with common headache disorders including migraine, tension type headache, cluster headache and chronic daily headache
- Understand the basic mechanisms and pathophysiology that underlie headache disorders such as migraine, cluster headaches and hormonally triggered headaches
- Develop an appropriate, multidimensional treatment plan that includes abortive, preventive and bio-behavioural treatment strategies for patients with headache disorders

Speakers

DR MANJIT MATHARU
